Ex : 3	Reporting Phishing Emails Using Email Client and Online Reporting Portals
Date:	

Aim:

To identify a phishing email and report it using an email client and official online phishing reporting platforms.

Requirements:

- Computer with internet connection
- Email account (Gmail / Outlook)
- Sample phishing email (real or simulated)
- Web browser

Procedure:

Part A: Identifying a Phishing Email

1. Open your email inbox.
2. Select a suspicious email.
3. Check for the following indicators:
    - Unknown or spoofed sender email address
    - Urgent or threatening language
    - Suspicious links or attachments
    - Spelling and grammatical errors
4. Do not click on any links or download attachments.

Part B: Reporting Phishing in Gmail

1. Open the suspicious email.
2. Click on the three dots (⋮) in the top-right corner.
3. Select Report phishing.
4. Confirm the action.

Part C: Reporting Phishing to National Cyber Crime Portal (India)

1. Open a web browser.
2. Visit the National Cyber Crime Reporting Portal.

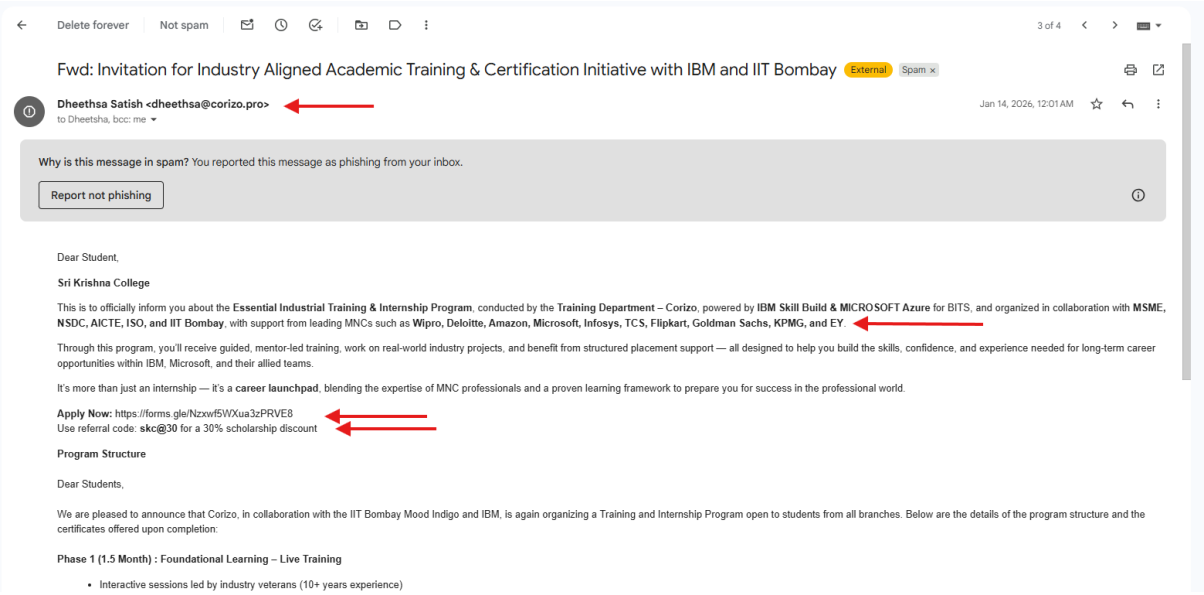
3. Select Report Cyber Crime → Report Other Cyber Crimes.
4. Fill in the required details and submit the complaint.

Execution:

Part A: Identifying a Phishing Email

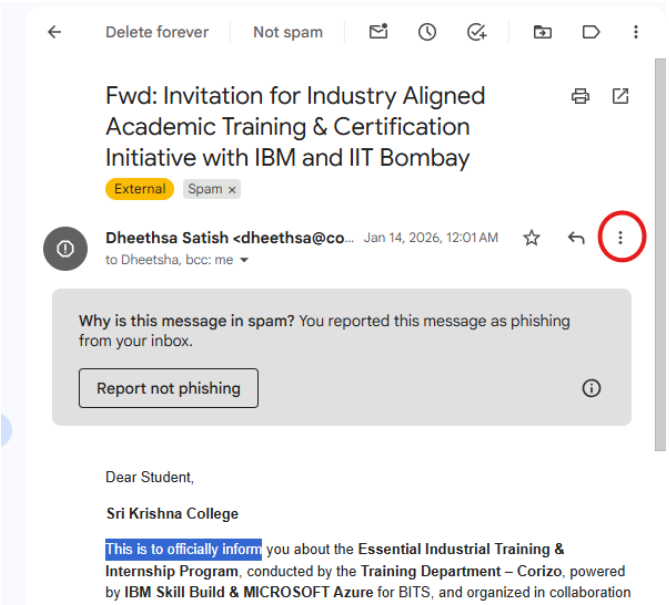
1. Open the suspicious email

The above image shows an example of a phishing email opened in the email client. The email claims that the user's account will be suspended and uses urgent and threatening language to create panic. It contains a generic greeting ("Dear Customer"), a suspicious sender email address, and a fake verification link. Such emails attempt to trick users into clicking malicious links and stealing sensitive information. Hence, the email is identified as a phishing email and should be reported instead of responding to it.



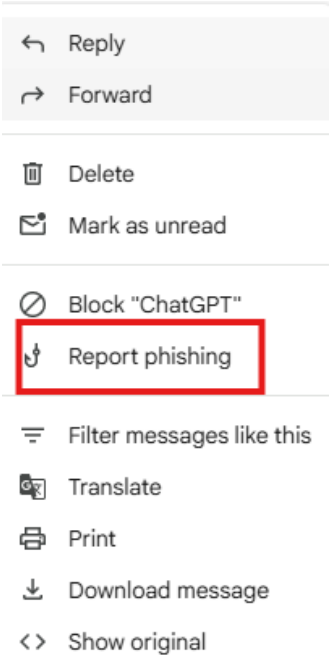
2.Click on the three dots (⋮) in the top-right corner

This step is used to open the email options menu for reporting the suspicious email.



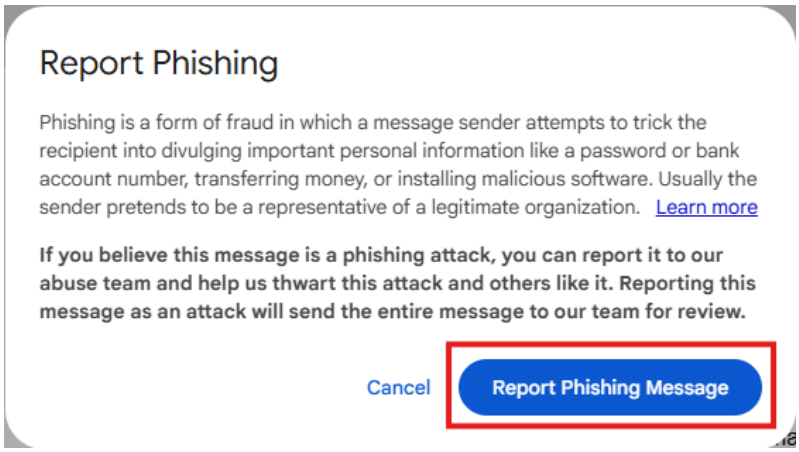
3.Select Report phishing.

- The image shows the process of reporting a phishing email using the three-dots.
- By clicking the three dots at top-right corner, additional email actions are displayed.
- From the menu, the “Report phishing” option is selected to report suspicious email.
- This action helps the email service provider identify and block phishing attempts.
- The reported email is moved to the spam/phishing category for security purposes.

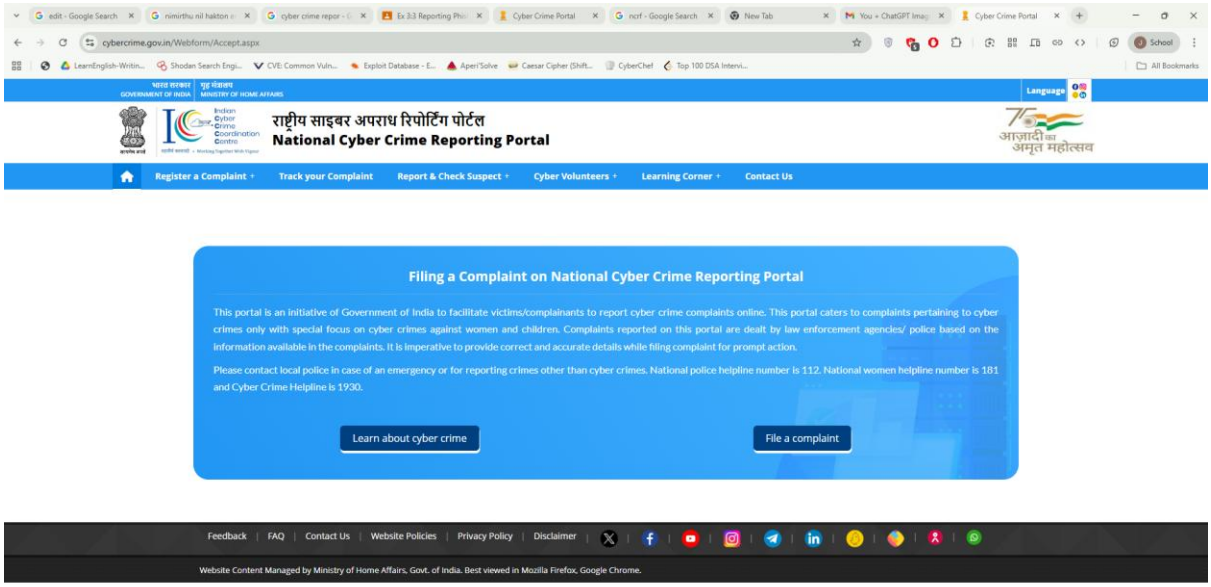


4. Confirm the action.

The image shows the confirmation window displayed after selecting the Report phishing option. The confirmation message asks the user to verify whether the email should be reported as a phishing attempt. By clicking Report phishing, the action is confirmed and the email is marked as malicious. After confirmation, the email is moved to the spam/phishing folder for security analysis. This step ensures that phishing emails are reported intentionally and helps improve email security.

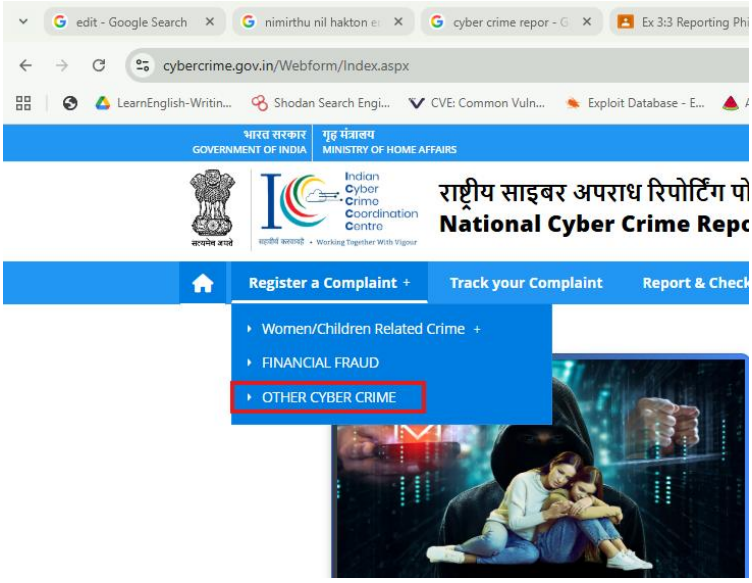


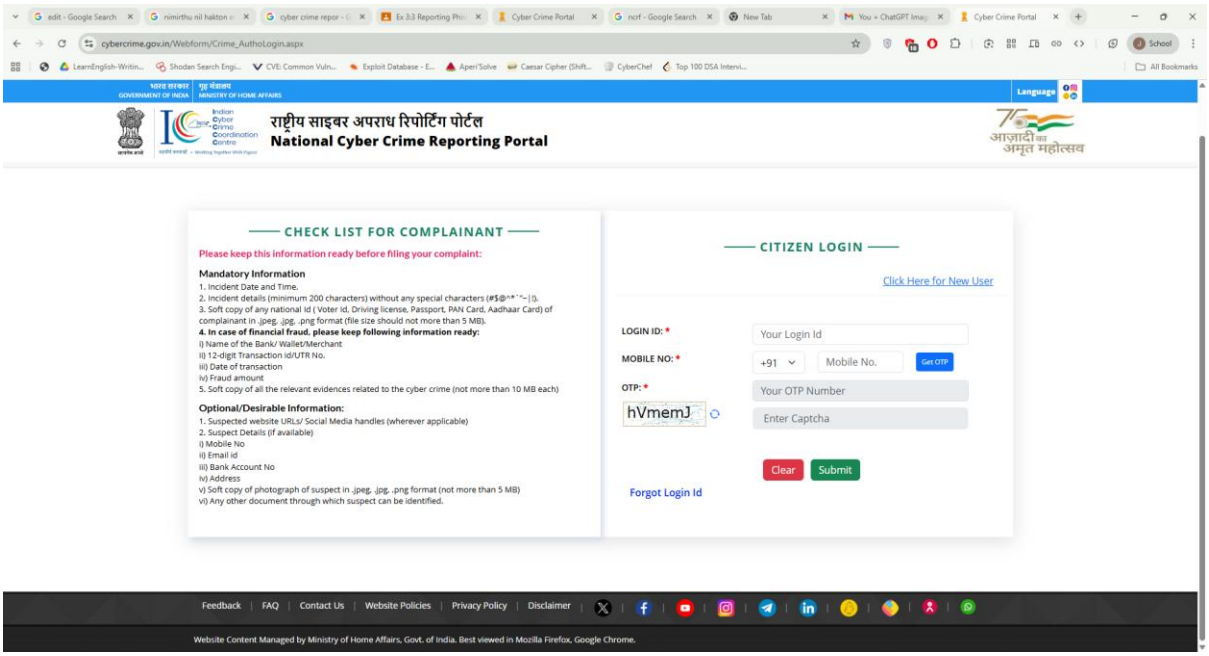
5. **Open a web browser and visit the National Cyber Crime Reporting Portal**
   To file a report, visit the National Cyber Crime Reporting Portal, a government platform for reporting all digital crimes.



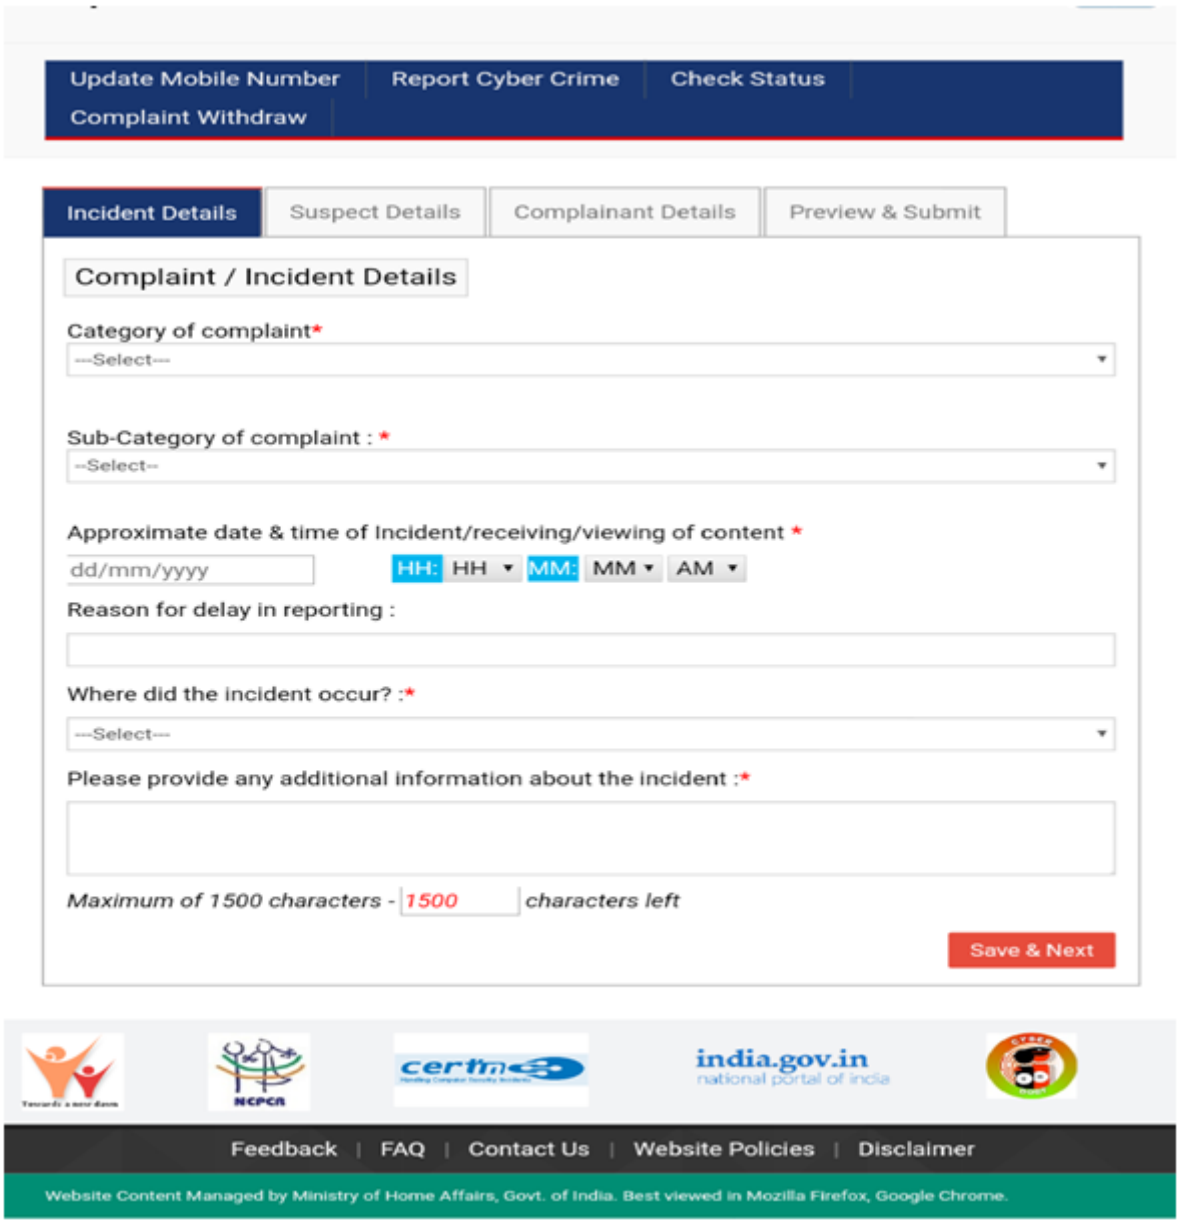
6. **Select Report Cyber Crime → Report Other Cyber Crimes**

Click Report Cyber Crime, then Report Other Cyber Crimes. Accept the terms and log in with your mobile number to start.





7. **Fill in the required details and submit the complaint**



1. **Record details of the incident:**
   Date of the Attack: 14 / 01 / 2025
   Timing: 00:01(IST)
   Descriptions: An Malicious Attacker intimates as a Sri Krisha college of engineering and technology and said to offer a placement for a amount of certain thousands and they claim to provide internship and job offers at top MNC companies like Google, Microsoft, Amazon, Wipro, TCS and another top companies and tries to click a fishing link and stole their money.
