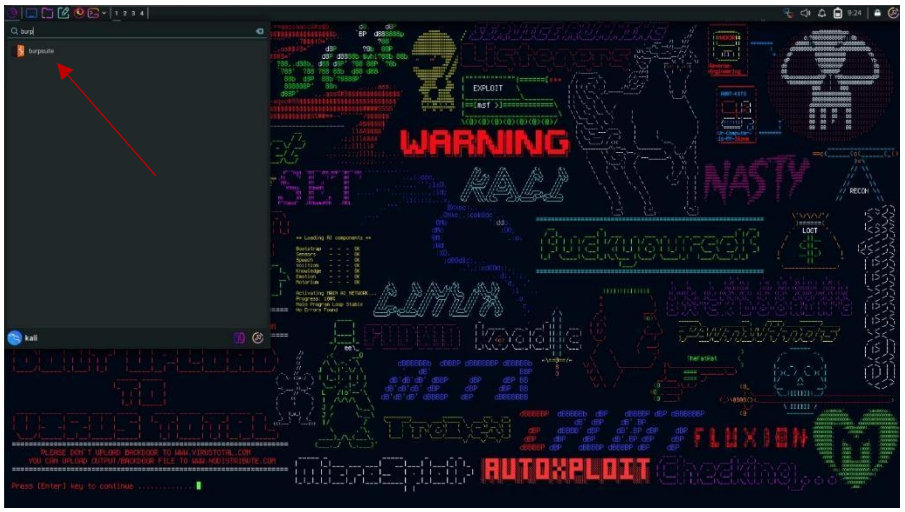
Ex No : 3	Practice The Tool – Burp Suite
Date :	

AIM:

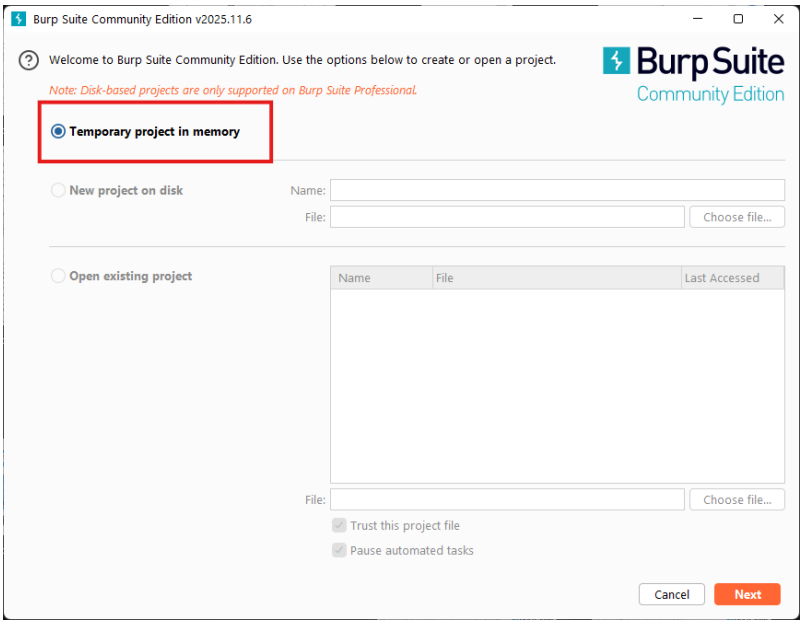
To intercept and analyze HTTP/HTTPS traffic using Burp Suite.

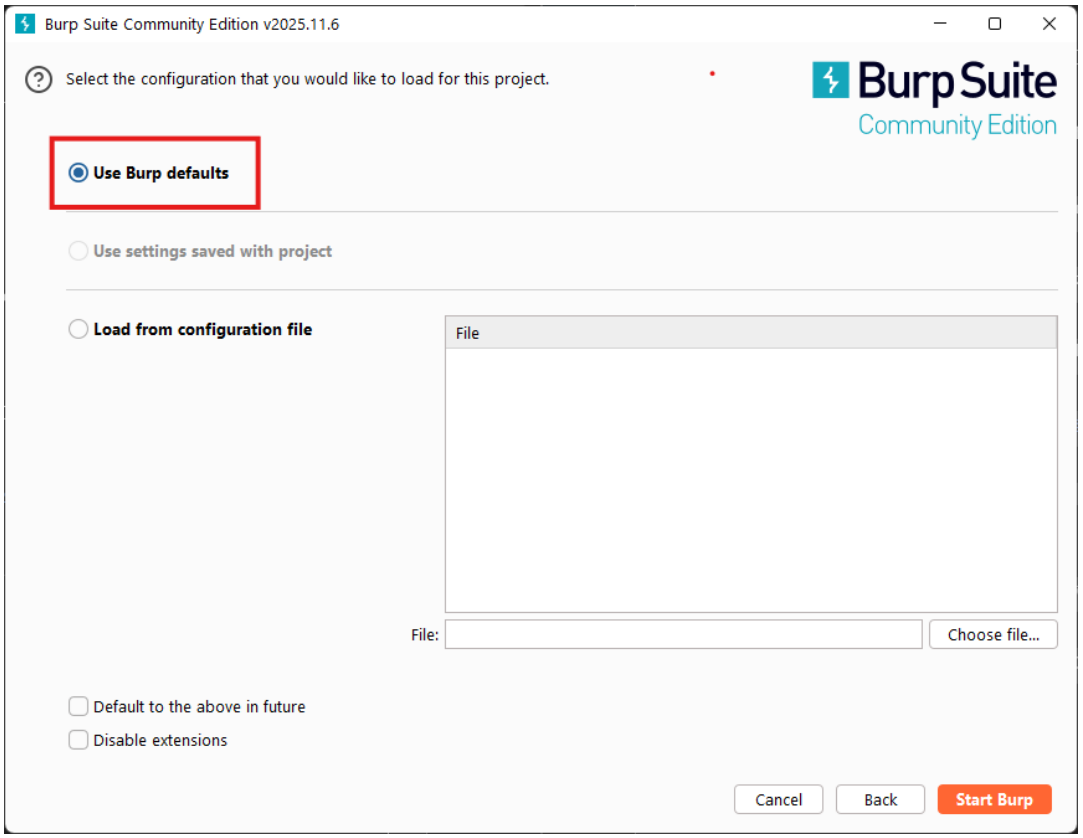
PROCEDURE:

1. Open **Burp Suite** from Kali Linux menu.

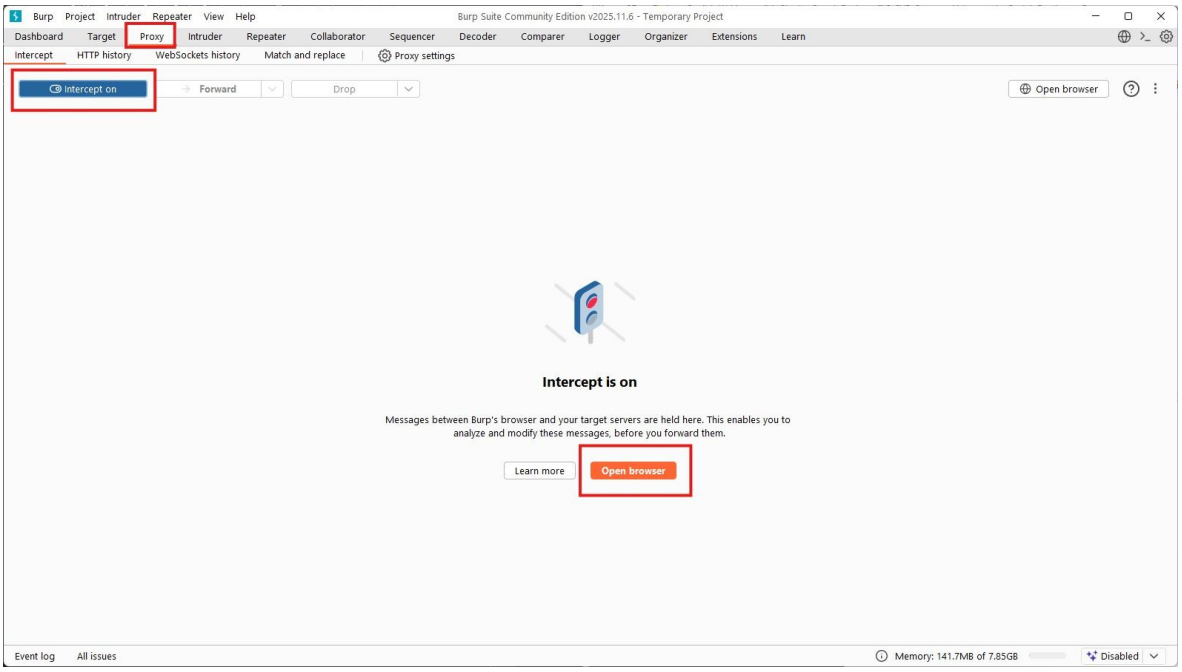


2. Select **Temporary Project** → Click **Use Burp defaults.**

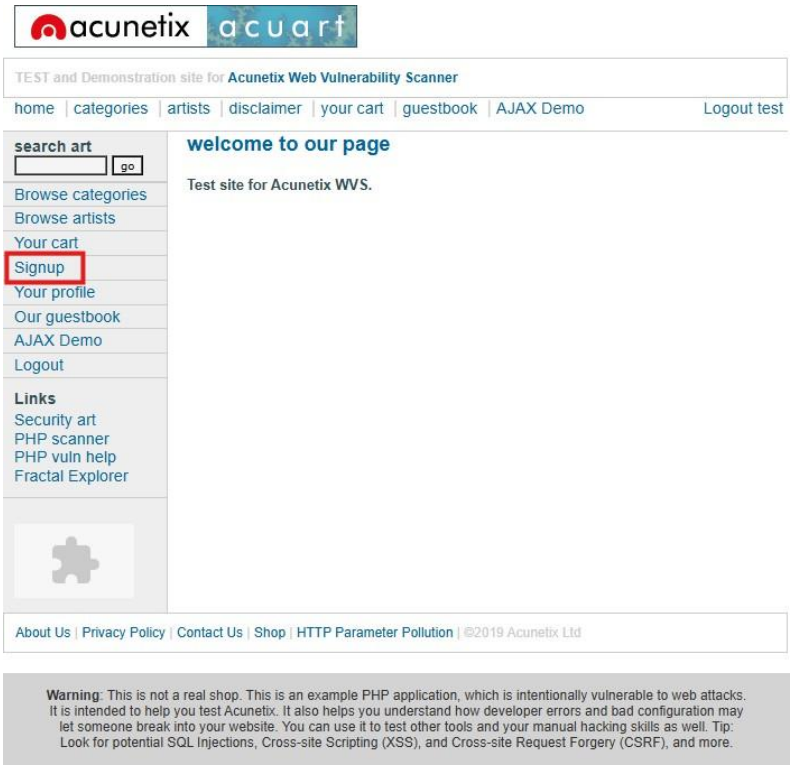




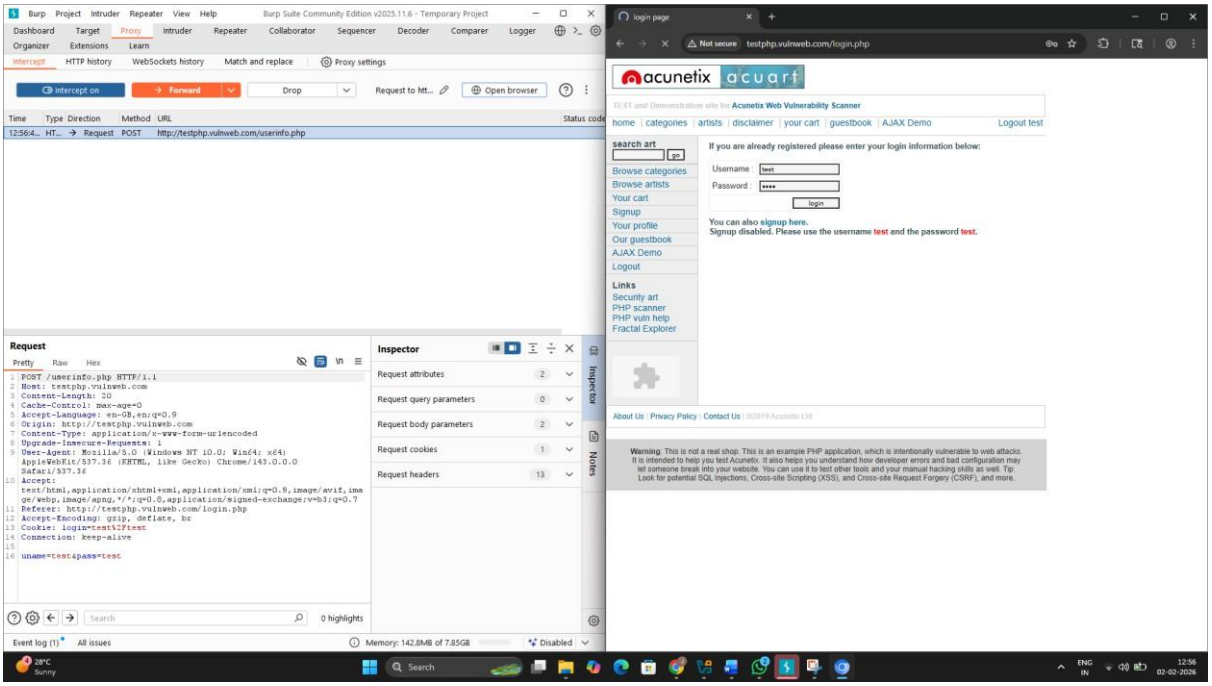
3. Go to **Proxy → Intercept** and turn **Intercept ON → Open Browser**.



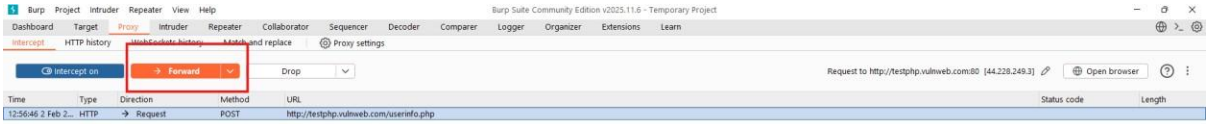
4. Browse a test website (e.g., http://testphp.vulnweb.com/login.php).



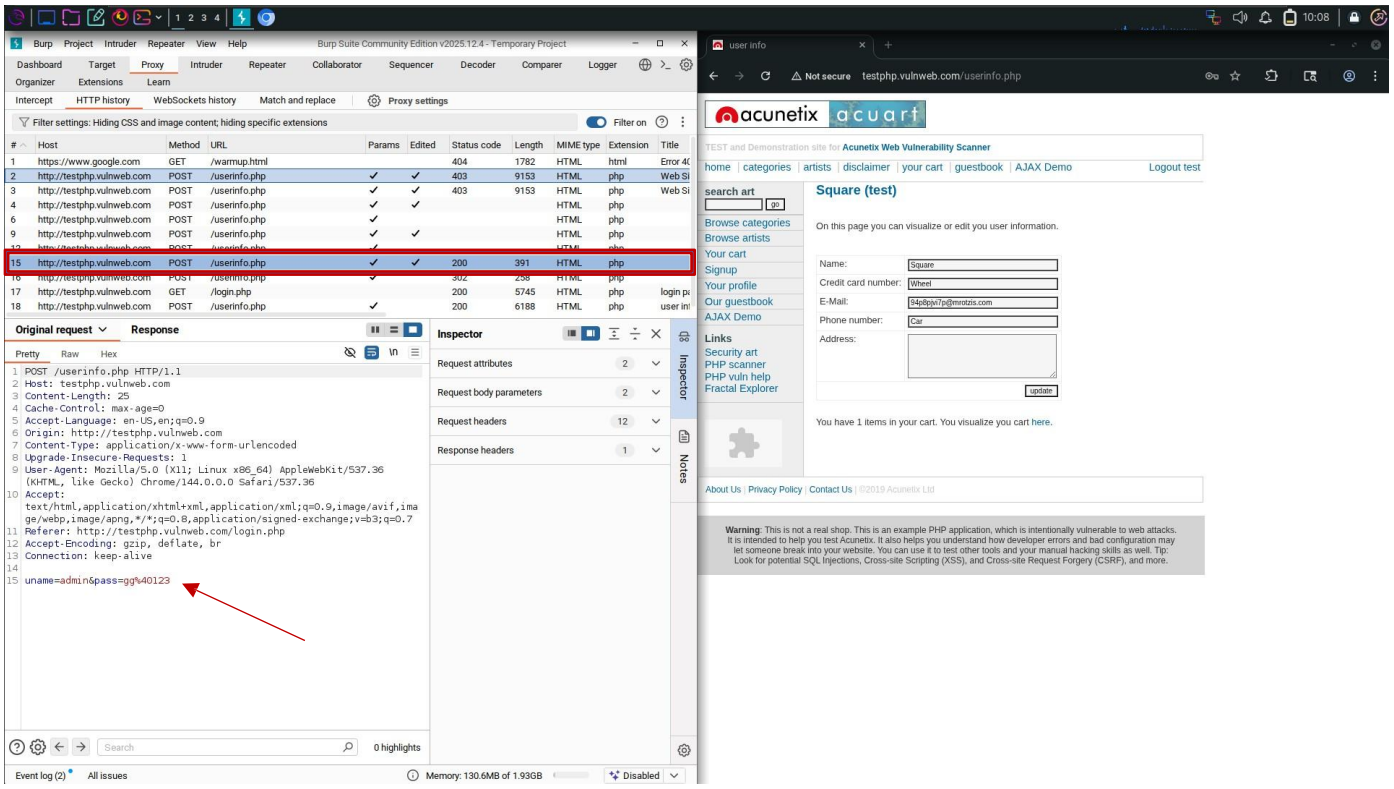
5. Test the Credential by adding **User: admin & Pass: admin** Observe intercepted requests in Burp.



6. Modify request parameters and forward them.



7. Analyze responses in **HTTP History**.



Result

Web traffic interception and modification was successfully performed.
